# Agenda

- AFP Payment Fraud Highlights
- Commercial Fraud Schemes - Recaps
- Incident Response Plan
- Resources
- Questions

# Payment Fraud and Control Survey Highlights

**Percent of Organizations That Are Victims of Payments Fraud Attacks/Attempts**

- Overall attacks have decreased
- Steady decline since 2018, but remains an issue
- 63% report “About the Same”
- 29% report “More”
- Remote work considered a factor for 32%

**Change in Incidence of Payments Fraud in 2021 Compared to 2020**  
(Percentage Distribution of Organizations)

**Share of Increased Fraud due to Employees Working Remotely**  
(Percentage Distribution of Organizations)

### Trends in Payments Fraud Activity

(Percent of Organizations that Experienced Attempted and/or Actual Payments Fraud)

# Regions Corporate Security

- 112 Associates – Backgrounds include former U.S. Secret Service, FBI, Federal Prosecutor, local law enforcement
- 57 Investigators located throughout the Regions footprint
- In 2021, Corporate Security worked 131,560 Alerts/Cases; 7,233 Cases worked by Field Investigators; 624 cases with a net loss of over \$10,000

# Check Fraud

# Traditional Check Fraud - Recap

## Check Fraud

### 1. Alteration

- › Change to face or back of checks
- › Results in non-conforming

### 2. Counterfeit

- › Illegal, unauthorized printing of checks

### 3. Forgery

- › Unauthorized maker's signature – produced manually or via fax
- › Unauthorized endorsements/payee claims
- › payments instructions/endorsements

### 4. Improper/missing endorsements

- › Endorsement is missing or doesn't conform to the way check was drawn

### 5. Non-negotiable check copy

- › Photocopy of check processed as an original check

# BEST PRACTICES

## 1 Reconcile to spot abnormal activity

- Reconcile your accounts in a timely manner.
- Segregate your accounts by purpose, type, and/or payment method.

## 2 Place stop payments on any checks that have been lost or stolen

## 3 Convert paper payments to electronic payments

### For Employees

- Use Automated Clearing House (ACH).
- If an employee does not have a bank account, offer to deposit their pay directly to a payroll card that allows them to use it like a bank debit card.

### For Vendors

- Pay via ACH or purchasing card.
- Use wire transfers for high-value or time sensitive payments as well.

## 4 Securely store check stock, deposit slips and bank statements, then destroy securely

## 5 Use Positive Pay

This powerful tool allows you to send information to your bank about the checks you've written so that when checks come in to pay, they are matched to what you've told them. Positive Pay is also available for ACH. If you've authorized a supplier or other partner to draft money from your account you can pre-approve these transactions.

# Ransomware

# Ransomware

- Fraudsters target an organization by placing malware on the organization's computer system and locking the system with encryption.
- Payment (ransom) is demanded before the fraudster releases the code to unlock the system.
- Fraudsters access the computer system through:
  - Infected software applications
  - Infected documents and files
  - Infected external storage devices
  - Compromised websites

## Examples or ransomware in the public sector

- States have recently passed legislation prohibiting government agencies from paying or negotiating a ransom (NC & FL)
- Critical infrastructure organizations are targets
- Need for adequate back up plans

■ A U.S. county was infected by Ryuk, taking almost all of the county's systems offline. The county had backup servers, but they were not isolated from the network, allowing them to be infected as well. The county paid a \$132,000 ransom.

■ A U.S. city's systems were infected by Robbinhood with a ransom demand of 13 Bitcoins (\$76,000). The attackers entered the network through old, out-of-date hardware and software. The ransom was not paid, but service restoration was estimated to cost over \$9 million.

When fraud occurs, what are the industry suggested next steps?

# Business Email Compromise (BEC) -

**NEARLY 80%**  
of reported fraud cases involve some form of  
**BUSINESS EMAIL COMPROMISE (BEC)\***

---

# Business Email Compromise - Recap

- 68% of companies experienced BEC (2022 AFP survey)
- Targets employees with access to company finances
- Directs employee to release funds to bank accounts thought to belong to trusted partners

## Iterations Over Time:

- **Executive email intrusion:** criminal impersonates senior executive requesting payment or order to purchase gift cards
- **Vendor email intrusion:** criminal impersonates vendor requesting the company to change payment remittance information
- **Employee email intrusion:** criminal impersonates an employee requesting the vendor to send payment account information or requesting the company change employee's direct deposit information

## Departments Most Vulnerable to Being Targeted by BEC Fraud (Percentage Distribution of Organizations)

2022 AFP® Payments Fraud and Control Survey Report:

# BEC – Means of Deception

- **Phishing** – bogus emails prompt victims to reveal confidential information
- **Social Engineering** – phone calls/conversations to gain trust
- **Identity Theft** – deliberate use of someone’s identity for financial gain
- **E-mail Spoofing** – slight variations on legitimate email addresses
- **Malware** – infiltration of networks

# Education and Awareness are Key to Prevention

▶ Are your **internal controls** strong enough?

▶ Over the past 18 months, have you experienced a **financial loss** related to fraud?

▶ Is access to your **networks and data** secure?

▶ Do you have a strong **vendor management program**?

▶ Do you have software in place to detect and stop **phishing & malware**?

▶ Do you have a **cybersecurity employee education & awareness program**?

▶ Do you have a **cybersecurity action & governance plan**?

# Three Industry Suggested Practices

## Guard Your House

1

- Conduct a thorough IT vulnerability assessment
- Work with your IT Department to create efficient and effective firewall protocols that guard and protect your systems and confidential information
- Regularly patch and update security systems and back up critical data offline
- Require the use of secure passwords or pass phrases
- Leverage fraud prevention tools - Positive Pay, ACH Positive Pay & Account Reconciliation

## Create an Associate Training Program

2

- Utilize the videos and information to educate critical payment stream positions. Resources include: [www.regions.com/stopfraud](http://www.regions.com/stopfraud) and [www.regions.com/fraud\\_prevention](http://www.regions.com/fraud_prevention)
- Perform regular phishing testing on Associates
- Encourage Associates to be aware of potential points of compromise
- Don't click on links or attachments from unknown sources

## Create a Fraud and Risk Governance Plan

3

- Identify and document risk tolerance
- Establish internal controls like a call-back procedure for changes in payments
- Create a robust vendor management program
- Document a detailed fraud response plan

# Call Back Control

If you receive an email requesting a change to the account number for payments:

**STOP** – **DO NOT** process the request received via email

**CALL** – Call the “sender” using a legitimate phone number known to you. **DO NOT** reply to the email, and **DO NOT** call the number listed in the email

**CONFIRM** – Verify that the real vendor or employee did, in fact request the change
